20. (Amended) The wireless moving image and audio transmitting system of claim 18, wherein said portable display terminal further comprises: a field strength detector for measuring a field of strength of radio wave transmitted from the moving image and audio transmitter, wherein said audio output determining unit determines the output destination of the audio at the terminal according to the measured field of strength.

REMARKS

This amendment is presented to make minor editorial corrections to the application.

Copies of the amended portion of the claims with changes marked therein is attached and entitled "Version with markings to show changes made."

Respectfully submitted,

Hisakazu KOBAYASHI et al.
